→ Applications

This device is used for the control of the process equipment in the hazardous environment. It can be used in the hazardous environment to control the process equipment. The device is used for the control of the process equipment in the hazardous environment. It can be used in the hazardous environment to control the process equipment.

installation in the control room or high density field cabinet, DIN 35 mm installation is convenient for installation and displacement.

- The devices were designed for use in pollution degree 2 and overvoltage category III as per IEC/EN 60664-1. If used in areas with higher pollution degree, the devices need to be protected accordingly.
- Installation position shall not be affected by strong mechanical vibration; impact and electromagnetic induction from signal terminal and power supply, should conform with the requirements on electromagnetic interference resistance of products in Class 3 industrial field atmosphere stipulated in IEC 61000-4; the atmosphere shall be free from gases that are corrosive to metal and plastic components.
- The apparatus must be installed, connected and adjusted by qualified personnel in non-hazardous area according with the instruction manual.
- The operator must strictly comply with the relevant local safety standards and guidelines.
